NO EFFICIENCY OR ECONOMY IN GOVERNMENT CONTROL
Myron T. Herrick Points Out What He Considers Dangers of Public Ownership.

CLEVELAND, Ohio, August 25.—Myron T. Herrick, of this city, member of the Executive Committee of the National Association of Owners of Railroad Securities, declared in a statement today that the transfer of the vast system of railroad lines to the control of the government, and which the government would control, would be a step toward the establishment in this country of a system of public ownership that would imperil the liberties of the American people.

Mr. Herrick, who was formerly Governor of Ohio and American ambassador to France, is a banker, director of the Erie Railroad and of the New York Life Insurance Company.

Mr. Herrick asserted in his statement that the experience of the last two years with the railroads, the telegraph and telephone lines, is ample proof that there is neither efficiency nor economy in government control. He said that such control and operation would defeat the purpose for which the railroad brotherhoods were established and that it would involve a huge addition to the public debt, as the value of the railroads is estimated at \$17,000,000,000.

Referring to the agitation by railroad employees through the officers of their organizations in favor of government ownership of the roads, Mr. Herrick said:

"This propaganda will be not favorably received by the people of this country who have always paid the bill. The deficit incurred in less than two years of Federal operation is almost more than \$200,000,000 and mounting at the rate of \$2,000,000 a day in spite of sharp increases in freight and passenger fares."

Carnation MILK

Carnation for the Children

Carnation is a pure, healthful drink for children because it is only fresh, sweet cows' milk with part of the water in the milk evaporated. It is sealed in the containers and sterilized—no impurities can possibly reach it.

To prepare Carnation for drinking, it should be diluted with pure water to the consistency of ordinary milk. Equal parts of Carnation and water make a rich, wholesome drink. If you prefer it not so rich, use two parts Carnation to three parts water.

All children should have a quart of milk a day.

GERMAN FINANCIAL WRITER IS CRITICAL OF AMERICA

Declares U. S. Government Should Permit His Country to Enter American Money Market.

(By Associated Press.)
BERLIN, August 25.—Georg Muech, financial writer for the Tageblatt, criticizes the United States for failing to assist Germany financially, and asserts that Americans are even guilty of inaction to depress the value of the mark artificially.

"Americans are exploiting Germany's needy situation most selfishly," he declares, "by delaying to grant credit which Germany needs."

He says the American government could now show whether it really wishes to help Germany in their work of reconstruction by allowing Germany to enter the American money market. "Not without reason," he concludes, "do the Germans of our economic leaders turn toward the east. It is ever clearer that rescue is to be found there."
